Would be good if a way to straighten this could be figured out. I know it is complicated with the water treatment and Luminaires.

All the dimensions in hatched area are very challenging to read. Please fix.

Impossible to tell direction of slope because arrow heads are tiny.

These ones are also rotated the wrong way because they are past 90 degrees rotated.

TBC = TO BACK CURB?
Haven't seen this acronym used before.

12±52.5

This hatching isn't necessary. The sidewalks and medians are already called out on Paving Plan and Roadway Sections. Hatching just add unneeded clutter.

Is it possible to drop the sidewalk down faster from the west so there isn't such a steep ramp here leading into 5th Ave? Would prefer lower than 8.2%
